Visa Status: Australian Citizen

Professional Summary:

- Azure Data Integration Lead with 19+ years of experience delivering enterprise-grade **data engineering, API integration, and cloud-native solutions** across financial services, government, utilities, and telecom. Strong expertise in **Azure Data Factory, Azure Data Explorer, Synapse, Event Hub, Event Grid, Azure Functions, Logic Apps, and API Management**, with deep capability in **data profiling, data analysis, data validation, multi-system data modelling, and metadata-driven pipelines**. Proven track record in designing secure, scalable, and high-performance integrations using **REST APIs, OAuth2, JWT validation, mTLS, RBAC, rate limiting, and reusable APIM policy frameworks**. Adept at modernizing data platforms using **Medallion architecture**, optimizing telemetry ingestion, automating CI/CD, and leading cross-functional teams to deliver reliable, governed, and production-ready cloud solutions.

Core Competencies – Data Integration & API Engineering:

- **Azure Data Engineering:** Azure Data Factory, Azure Data Explorer (ADX), Azure Synapse, Data Lake, ETL/ELT, metadata-driven pipelines, Medallion architecture
- **Data Quality & Modelling:** Data profiling, data analysis, data validation, multi-system data modelling, KQL, T-SQL, telemetry ingestion, SCADA ingestion
- **API Integration & Security:** Azure API Management (APIM), REST API design, OpenAPI/Swagger, OAuth2, JWT validation, mTLS, RBAC, rate limiting, policy transformation, API governance
- **Integration Architecture:** Event-driven architecture, hybrid integration (sync/async), cloud-native integration, scalable ingestion pipelines, integration reliability, integration optimisation
- **DevOps & Automation:** Azure DevOps CI/CD, YAML pipelines, IaC (PowerShell), Key Vault, Application Insights, Azure Monitor, Log Analytics
- **Leadership & Delivery:** Integration leadership, solution design, architecture documentation, stakeholder management, cross-functional collaboration, production support, release management, Agile/Scrum

Technical Skills:

- **Cloud Integration:** ADF, ADX, Synapse, Functions, Logic Apps, APIM, Service Bus, Event Hub, Event Grid
- **Programming:** C#, .NET Core, Java, Python Data: Azure SQL, Oracle, MySQL, Cosmos DB, KQL, T-SQL
- **DevOps:** Azure DevOps, CI/CD, YAML pipelines, IaC (PowerShell)
- **Tools:** Git, Azure DevOps, Visio, Draw.io, Confluence
- **Architecture:** REST APIs, event-driven patterns, metadata-driven pipelines

Certifications:

- **DP-203: Data Engineering on Microsoft Azure**
- **AZ-204: Developing Solutions for Microsoft Azure**
- Oracle SOA Foundation Practitioner
- Sun Certified Java Programmer
- Oracle Certified Associate – SQL

Professional Experience:

Housing Australia, Sydney, Australia

Mar 2026 – Till Date

Integration Developer

- Designed and delivered **Azure-based data and API integrations** across Treasury and Loan Management System (TALMS), CBA and Yieldbroker, FinOps and FIS-Quantum using Azure Functions, APIM, logic app and Data Factory.
- Implemented layered **API security** including OAuth2, Entra ID JWT validation, mTLS, IP allowlisting, RBAC, and subscription governance.
- Built **scalable ingestion pipelines** using Event Hub, Event Grid, Azure SQL, and Logic Apps.
- Delivered regulatory enhancements for Help to Buy and 5DS applications ensuring **data accuracy, validation, and compliance**.
- Improved **API observability** using Application Insights, Azure Monitor, and Log Analytics.

Technologies: ADF, Azure Functions, APIM, Azure SQL, Azure Storage Account (Blob, Tables), .Net, Azure Logic App (standard & Consumption), Event Hub, Event Grid, Key Vault

Award: High Five recognition for Excellence

WaterNSW, Sydney, Australia

Jan 2024 – Feb 2026

Data Integration Lead

- Led enterprise **Azure data engineering** delivery for real-time and batch telemetry ingestion from eagle.io, Hydstra, and Hydrotel into Azure Data Lake and ADX.
- Performed extensive **data profiling, data analysis, and data validation** of 400K+ migrated records using KQL and metadata-driven frameworks.
- Designed **multi-system data models** using Medallion architecture with standardised naming conventions and cross-system mappings.
- Built scalable **SCADA ingestion pipelines** using GUID-based identity mapping, chunking, batching, and SOAP API optimisation.
- Implemented **telemetry interpolation** using ADX functions and scheduled Azure Functions to ensure modelling accuracy.
- Introduced **Azure Data Sharing** to separate ingestion and consumption workloads, improving analytics performance.
- Delivered **event-driven integrations** using Event Hub, Event Grid, and Logic Apps with full monitoring and governance.

Technologies: ADX, ADF, Synapse, Databricks, Azure Data sharing, Azure Function app, APIM, Azure SQL, Azure Storage Account (Blob, Tables, Queue), .Net, Logic App, Event Hub, Event Grid, Key Vault, Azure File Share, Data Flow

Awards: Dam Good Awards

Angle Auto Finance, Sydney, Australia

Aug 2021 – Nov 2023

Design and Development Lead

- Led Azure-based **integration architecture** for EDI, Novated Leasing, and Dealer Portal using APIM, ADF, Service Bus, and Functions.

- Designed **hybrid integration patterns** (sync/async/event-driven) across internal systems and external partners (Equifax, Australia Post, Salary Packagers).
- Built and exposed **REST APIs** using App Services + APIM with full OpenAPI/Swagger documentation and governance.
- Integrated React front-end, MuleSoft, and Azure microservices into a unified **cloud-native integration ecosystem**.
- Re-architected EDI solution and delivered production migration with improved **data quality, validation, and reliability**.
- Implemented **CI/CD automation** using Azure DevOps, YAML pipelines, and Key Vault-based secret management.

Technologies: Logic Apps, ADF, Service Bus, Azure Functions, APIM, Azure SQL, App Service, Storage Account, Event Hub, Event Grid, Cosmos DB, Key Vault

Award: Team Anglers of the Year

Cognizant Technology Solutions, Sydney, Australia

March 2020 – Aug 2021

Senior Integration Developer

- Delivered Azure-based integrations across PeopleSoft, Adobe Campaign, RAMS, and Dynamics 365.
- Built **data transformation pipelines** using ADF and optimised large-scale SQL processing.
- Automated SAS token rotation using Logic Apps, Functions, Key Vault, and PowerShell.
- Developed reusable **error-handling frameworks** improving reconciliation and reducing operational effort.
- Contributed to backend development using Java Spring Boot and DynamoDB; supported legacy OSB integrations and Splunk monitoring.

Technologies: Logic Apps, ADF, Service Bus, Azure Functions, Azure SQL, Storage Account, Event Hub, Event Grid, Key Vault, Oracle SOA, OSB, Java, Splunk

NBN Via Infosys, Sydney, Australia

May 2019 – Feb 2020

Senior Integration Developer

- Developed enterprise SOA/OSB integrations across telecom systems including Appian, ServiceMax, AWS Gateway, and Oracle E-Business Suite.

Technologies: Oracle SOA suite 11g & 12c, Oracle Service Bus 11g, Java, Oracle 10g, Oracle Data Integrator 11g.

Earlier Professional Experience:

- **Cognizant India — Project Manager (2013–2019)** Led Oracle SOA/OSB integrations, automated support processes, delivered SAP/CPQ/Salesforce integrations. **Awards:** CKlub Trophy, Shining Star Award
- **Mphasis — Senior Software Engineer (2010–2013)** Built SOA interfaces for General Motors; developed identity management solutions. **Award:** Client Spot Award
- **Scope International — Senior Analyst (2009)** Developed and maintained DICT3 banking application.
- **Keane India — Senior Software Engineer (2006–2009)** Delivered enterprise applications for NACCO and internal systems. **Award:** Best Performer Award

Education

- Master of Computer Application (M.C.A), Madurai Kamaraj University (2006)

- Bachelor of Science in computer science, Madurai Kamaraj University (2003)

Awards & Achievements

- **High Five Recognition – Excellence Housing Australia · Aug 2026:** Recognized by Jeff Ai for “outstanding technical expertise and dedication to delivering robust, high-quality technical solutions that drive positive outcomes.”
- **Dam Good Award – WaterNSW (2025):** Recognized for successfully delivering integration between Data Acquisition System (DAS) and Water Accounting System (WAS).
- **Team Anglers of the Year – Angle Auto Finance (2023):** Awarded for cross-functional collaboration and successful delivery of the Dealer Portal.
- **CKlub Trophy & Shining Star Award – Cognizant (2016):** Honored for developing Oracle SOA training materials and contributions to the OSP Techstack practice.
- **Client Spot Award – General Motors (via Mphasis, Nov 2012):** Recognized for building an automation tool that reduced manual SOA code review effort.
- **Best Performer Award – Keane International (June 2007):** Awarded for outstanding performance and contribution to project delivery.
